Gigaset S700H PRO**

# Gigaset S700 HRC

The all-rounder for daily use behind single and multi cells with a wide range of functions!

The new S700 HRC developed to provide optimum support for everyday working life. The large 24" TFT display dominates the disinfectant-resistant surface of the handset and fits comfortably in the hand. The excellent battery life, with up to 30 hours standby, makes the S700 HRC the perfect companion for everyday work. The high quality surface that makes the handset scratch- and disinfectant-resistant, protects the easy-to-read keypad. Business functions such as the hotel option, the separately programmable alarm button, the IPD protection class and the audio profiles that can be selected via a separate key make it easy to use in professional working environments. It can thus be individually adapted to the user's needs. The handset offers Bluetooth® 4.2 and an integrated 3.5mm jack connection to handle both cordless and corded headsets. The handset is optimised for use with all professional Gigaset DECT systems. In addition, the S700 HRC can be used with other CA-FIQ & CAP-compatible base stations in single and multi-cell environments.

## Feature highlights

- Large illuminated 24" TFT colour display
- Intuitive user interface for easy operation
- Handset operation via Bluetooth® 4.2 or 3.5mm jack

- Charging
  - Up to 12h talk time
  - Up to 30h standby time
  - Charging also via Micro USB connection
  - Charging cable included free of charge
- Full compatibility with the professional Gigaset DECT Single and multi-cell systems

### Tangible evolution - outside and inside

The new Gigaset S700 HRC handset from the Gigaset Professional Series impresses with its large 24" TFT display and a host of business functions such as SUOIA, Bluetooth® 4.2, audio profiles and brilliant sound quality HDSP ready / MCAT-1Q/20. With the audio profiles you can adjust the volume to suit you needs at the touch of a button. The professional range of functions is rounded off by the vibration alarm, the Micro USB interface and the excellent battery life.

**Additional security with the hotel option and alarm button**  
This option deletes all call lists and other private data from the device at a pre-definable interval so that the next hotel or room guest, cannot access them. This option makes it easier for the operator to meet the security requirements of the end users. Optimised for Gigaset single and multi cells and for use behind alarm systems<sup>3</sup>.

### Resistant to disinfectants and scratches

The high quality surface includes the housing, keyboard and display. In addition, the surface of the handset is protected against scratches in everyday use by a hard surface coating. This also protects the handset against the effects of commercially available disinfectants. Especially suitable for cleaning against bacteria and viruses. You can find an overview of tested disinfectants on Gigaset Professional Wiki. The housing is also designed to keep metal dust outside the handset.

<sup>1</sup> Based on software update to CA-FIQ 21

<sup>2</sup> Depending on base station and/or FBX provider

<sup>3</sup> Available at a later date

- Relative Humidity between 20% and 75% noncondensing

## Gigaset S700 HERO

Order number: S30852H974R102

## Accessories

- Gigaset 360° Swivel Belt Clip  
Order number: S30852Z2974R142

The robust Gigaset swivel belt clip made of high quality plastic consists of two parts - the handset carrier and the belt clip. This allows S700 HERO to be attached to an ordinary belt. Due to the 360° rotation feature the handset is optimally fixed and still offers the desired freedom of movement. All connections on the device are still freely accessible.

<sup>9</sup> Instead scope of delivery - colour changed for better display

<sup>4</sup> Changeable accessories - colour changed for better representation
